1st International Conference on

3DIMS

3D Materials Science, 2012

July 8-12, 2012

Seven Springs Mountain Resort, Seven Springs, Pennsylvania

Join **TMS** for this inaugural event and premier forum on three dimensional characterization, quantitative analysis, and development of structure-property relationships of materials. The **2012 International Conference on 3D Materials Science** is the first TMS specialty conference offered in this critical growth area of materials science.

TECHNICAL SCOPE

- Covering a range of topical areas representing the most critical and rapidly growing areas of 3D materials science
- Intimate environment conducive to rich programming and interaction among key researchers
- Up to three concurrent sessions for ultimate interaction and discussions
- Using state-of-the-art subtopics to roadmap key areas for future research in 3D materials science

WHO SHOULD ATTEND

Scientists, engineers, managers, government program officers, professors and students involved in 3D materials science

ORGANIZERS

- Alexis Lewis, *U.S. Naval Research Laboratory* (lead)
- Marc DeGraef, *Carnegie Mellon University, USA*
- Henning Poulsen, *Risoe National Laboratory and DTU, Denmark*
- Jeff Simmons, *U.S. Air Force Research Laboratory*
- George Spanos, *TMS*

TMS

Sponsored by:

TMS Advanced Characterization, Testing and Simulation Committee
