Sulfide Flotation

Part of the Extraction 2018 global extractive metallurgy conference

New for Extraction 2018, this symposium encompasses a variety of aspects impacting the flotation of base and precious metals such as Cu, Pb, Zn, Mo, PGM, Au, and Ag. The focus is on practical applications, with each session designed to convene metallurgists, scientists and operators to discuss technologies and processes to improve flotation performance and address the myriad challenges facing the industry. Of particular interest are presentations examining the following technical scopes:

- Flotation plant design and operational challenges
- Flotation process mineralogy and geometallurgy
- New developments in flotation chemistry
- Recent advances in flotation equipment

BENEFIT YOURSELF... AND YOUR BUSINESS

Plan Now to Attend Extraction 2018

Don't miss the industry's first collaborative global metallurgy conference focused exclusively on extractive topics, including business and economic issues. Extraction 2018 brings together the latest in technical research, provocative insights from recognized industry leaders, valuable plant tour experiences, an expanded trade show, and an abundance of business development opportunities into one dynamic meeting.

A Collaboration of Leading Societies in Extractive Metallurgy

Extraction 2018 is organized by the Metallurgy and Materials Society (MetSoc) of the Canadian Institute of Mining, Metallurgy and Petroleum (CIM); the Society for Mining, Metallurgy & Exploration (SME); and The Minerals, Metals & Materials Society (TMS).
