

# TMS 2010

139th Annual Meeting & Exhibition

February 14 - 18, 2010, Washington State Convention Center, Seattle, Washington USA

## Bauxite Residue and Disposal Database (BRaDD) Workshop

Sunday, February 14, 1 to 4 p.m.

BRaDD is a freely available database collating all public information on bauxites, including processing and the subsequent production of residue. The current content of the database represents only a fraction of the information that is possible to collect. To further develop BRaDD into a comprehensive industry resource, citable company information across a range of data fields must become available. The purpose of this workshop is to demonstrate the capability of BRaDD and initiate a forum discussion on how to best engage industry input to build this incredible resource.

### Who should attend?

Industry professionals who realize the infinite value of BRaDD and are interested in developing the database into a comprehensive resource.

### Instructors

Craig Klauber, Markus Gräfe, Dave Pang and Peter Smith, Light Metals Flagship, CSIRO Process Science and Engineering, Australia.

### How to Register

Registration is FREE for the first 25 attendees who sign up. Please contact Nate Natale, Technical Support Specialist, [natale@tms.org](mailto:natale@tms.org). After that quota is met, the cost is \$100 for members and \$125 for nonmembers. Register by January 15, 2010 using the [online registration form](#) or download the [registration form \(PDF\)](#) and mail or fax with your payment.
