

TMS2015

144th Annual Meeting & Exhibition

March 15-19, 2015 • Walt Disney World
Orlando, Florida, USA

Connecting the global minerals, metals, and materials community.

Plan Now to Attend:

Refractory Metals 2015

Refractory metal experts will gather for discussions and updating technical progress in advancing processing, testing, and applications of these materials in energy, transportation, and other systems. These systems demand structural materials that can maintain their stability, environmental resistance, and mechanical properties at the high temperatures driven by ongoing technological advancements. Refractory metals are defined by metallic elements with melting temperature above 1850°C.

Sponsored by:

- TMS Structural Materials Division
- Refractory Metals Committee

Organized by:

Gary Rozak, HC Starck Inc (USA)
S.K. Varma, University of Texas El Paso (USA)
