

# TMS2016

145<sup>th</sup> Annual Meeting & Exhibition

FEBRUARY 14-18 DOWNTOWN NASHVILLE,  
TENNESSEE MUSIC CITY CENTER

Connecting the Global Minerals, Metals, and Materials Community.

## Phase Stability, Phase Transformations, and Reactive Phase Formation in Electronic Materials XV

This is the 15th in a series of TMS symposia addressing the stability, transformation, and formation of phases during the fabrication, processing, and utilization of electronic materials and devices.

### Topics of interest include:

- Microelectronic technologies
- Advanced energy technologies
- Phase stability, transformation, formation, and morphological evolution of electronic packaging materials
- Interconnection materials
- Integrated circuit materials
- Energy storage and generating materials

### Organizers include:

Shih-kang Lin, National Cheng Kung University (Taiwan)  
Chao-hong Wang, National Chung Cheng University (Taiwan)  
Jae-Ho Lee, Hongik University (South Korea)  
Ikuo Ohnuma, National Institute for Materials Science (Japan)  
Chih-Ming Chen, National Chung Hsing University (Taiwan)
