Pan American Materials Congress: Materials for Lightweighting

Submit Your Abstract at www.tms.org/PanAmCongress

This symposium focuses on characterization, modeling, testing and engineering applications for materials-based lightweighting innovations.

Specific theme areas for abstract submissions include (but are not limited to):

- Metallic alloys for structural applications
- Composites (including metal-, ceramic-, and polymer-matrix composites)
- Microstructural evolution and characterization in materials for lightweight applications
- Microstructure-property relations in materials for lightweighting
