

JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: *April 2024*

Manuscript Deadline: *October 1, 2023*

Innovations in Forming Technologies for Light Alloys

Light weighting applications require novel forming approaches and technologies, e.g. hydroforming, free-forming, giga-casting, electromagnetic forming, as well as advances in traditional forming technologies. Original and review papers are invited on the development and improvement of forming technologies for light alloys, including numerical modelling and process optimization. Scientific novelty and relevance to industrial/manufacturing applications must be demonstrated for manuscripts to be considered for publication.

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: **Advanced Processing; Aluminum; Lightweight Materials; Magnesium**

Guest Editor(s): **Dmitry Eskin:**
dmitry.eskin@brunel.ac.uk

Committee Sponsor(s): **Aluminum**

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
