Manuscript Deadline: *March 1, 2024*

Measurements and Evaluations of By-products in Al Recovery and Recycling

Globally there is an increasing focus on resource utilization and environmental impact of aluminum production and recycling. The ability of recycling includes methods, measurements, and theoretical considerations in industry and research. This topic invites research on the measurements and evaluations of the by-products during recovery and recycling of aluminum and aluminum-related production (e.g., off gases, salt-cake).

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:

<http://www.tms.org/AuthorTools/>

Keywords for this topic: Aluminum; Characterization; Recycling and Secondary Recovery

Guest Editor(s): Anne Kvithyld and Hong Peng:

anne.kvithyld@sintef.no; h.peng2@uq.edu.au

Committee Sponsor(s): Aluminum

If you are interested in submitting a paper, upload your manuscript at <https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
