

# JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

**Publication Date:** *November 2018*

**Manuscript Deadline:** *June 1, 2018*

**The High Temperature Alloys Committee is seeking papers on the topic of**  
***Advances in Superalloys and Other High-Temperature Alloys***

Advances in superalloys and other high-temperature alloys have been largely driven by the demand for improved power and efficiency across the power generation, aerospace, chemical, oil and gas and propulsion industries. This topic seeks new technical information and critical reviews on the technology of high-temperature alloys. Areas of interest may include (but are not limited to): alloy development, advanced processing, long-term durability and stability, environmental damage, advancement in testing capabilities, and joining technologies.

Original research papers should be 3,000-6,000 words with up to 8 figures maximum; review papers should be 6,000-10,000 words with up to 15 figures maximum.

Detailed author instructions are available at:

<http://www.tms.org/AuthorTools/>

**Guest Editor for this JOM topic is Kevin Bockenstedt:**  
[kevin.bockenstedt@atimetals.com](mailto:kevin.bockenstedt@atimetals.com)

If you are interested in submitting a paper, upload your manuscript at  
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
