Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: July 2018

Manuscript Deadline: February 1, 2018

The Materials Characterization Committee is seeking papers on the topic of Application of Advanced Characterization Techniques for Engineering Materials

Emphasizing practical applications and real-world case studies, this topic on advanced characterization techniques presents the principles of widely used, advanced surface and structural characterization techniques for quality assurance, contamination control, and process improvement. Papers are invited addressing useful basic principles and applications of modern technologies used to characterize engineering materials, explaining appropriate uses and related technical requirements for characterization techniques.

Typical paper length is 5,000 to 6,500 words for review papers, and 2,400 to 4,000 words for original papers.
