JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

A STATE OF A STATE OF

Publication Date: *August 2018* Manuscript Deadline: *March 1, 2018*

The Recycling and Environmental Technologies Committee is seeking papers on the topic of *Manufacturing with Recycled Materials*

Recycling and reprocessing of materials at the traditional end of life cycle can ideally result in feedstocks which can be used to manufacture the same product (for example, aluminum cans, copper and steel scraps, etc.). However, some valorized waste materials cannot be used in the same high-value application that created the waste. This special topic addresses new material innovations that are needed to appropriately up-cycle and down-cycle the recovered materials into appropriate technology.

Typical paper length is 5,000 to 6,500 words for review papers, and 2,400 to 4,000 words for original papers. Detailed author instructions are available at: http://www.tms.org/AuthorTools/

Keywords for this topic:

Advanced materials, aluminum, environmental effects, environmental technologies, extraction and processing, iron and steel, manufacturing and markets

Guest Editors for this *JOM* topic are John Howarter and Mingming Zhang:

howarter@purdue.edu; Mingming.Zhang@ArcelorMittal.com

If you are interested in submitting a paper, upload your manuscript at https://www.editorialmanager.com/jomj/

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
