INFORMATION FOR AUTHORS

Work made for hire: If you are an employee and your paper was prepared as a part of your job, the copyright to the paper belongs to your employer. If you as an author sign the copyright transfer form, we assume that you are authorized by your employer to do so and that your employer has consented to all the terms and conditions of this form. If not, it should be signed by someone so authorized.

Joint Authorship: For jointly authored papers, only one signature is required if all authors work for the same company; the paper thus is a "work made for hire," the copyright rests with the employer rather than the individual authors, and anyone authorized by the employer may authorize the copyright transfer. When the authors work for different employers, a separate copyright transfer form must be signed by an authorized agent for each employer. When authors are self-employed, each must sign a separate copyright transfer form. Coauthors who are U.S. government employees are not required to sign this form, but any coauthors outside the U.S. government must sign Part A.

Work performed under U.S. government contract: Authors whose work was performed under U.S. government contract but who are not employees of the U.S. government are required to sign Part A - Copyright Transfer. Item 5 of Part A returns reproduction rights to the U.S. government when required for U.S. government purposes, while retaining TMS copyright protection with respect to reuse of the material by the general public.

TMS policy on assignment of copyright: As a convenience and courtesy to the technical community, TMS routinely grants permission upon request to authors to reproduce tables, figures, or other portions of works by other authors for which copyright has been transferred to TMS. TMS reserves the right to use any parts or the entire manuscript in revised editions, derivative works, etc. published by the Society.

Publisher Indemnity: The author agrees that the article has not been previously submitted for publication or published elsewhere. Further, the author agrees that the article is original and that it contains no matter which is libelous, obscene, or infringes any existing right of privacy, copyright, trademark or any other statutory or common law proprietary or civil right and is not otherwise unlawful. The author agrees to indemnify, defend, and hold The Minerals, Metals & Materials Society (TMS) and its directors, officers, employees, and agents harmless against any claims to the contrary.

FORM SUBMISSION INSTRUCTIONS:

Upload this copyright form along with the manuscript to the ProgramMaster website. The copyright transfer will not take effect for manuscripts that are not accepted for publication.
