

# CONTENTS for Volume I

Author Index .....	859
--------------------	-----

\*indicates extended abstract

## Precipitation in Steels I – Physical Metallurgy and Property Development: HSLA Steels: Microalloying

<b>Precipitation Hardening of Ferrite in Commercially Processed Niobium-Bearing HSLA Steels</b> <i>A.J. DeArdo, M. Hua, C.I. Garcia and V. Thillou</i> .....	3
<b>Transformation and Precipitation Behavior in Low Carbon Microalloyed Steels</b> <i>T. Shinmiya, N. Ishikawa and S. Endo</i> .....	11
<b>Control of Grain Size by Second Phase Particle Additions in Novel HSLA Strips</b> <i>C.A. Khoo and G. Fourlaris</i> .....	21
<b>Characterization and Modelling of NbC Heterogeneous Precipitation in Model IF Steels</b> <i>F. Perrard, A. Deschamps, P. Donnadieu and P. Maugis</i> .....	31
<b>Hot Deformation Behavior of Mn-Al and Mn-Al-Nb Steels</b> <i>E.I. Poliak and F. Siciliano</i> .....	39

## Roll Technology I: Practices Affecting Rolls

<b>The Optimization of FM Work Roll Cooling Condition for HSM</b> <i>W. Changan</i> .....	49
<b>Simulation of the Mill Thermal Conditions and Designing of the Mill Cooling System when Rolling Very Thin Hot Strips</b> <i>E.A. Garber, O.A. Kuvshinnikov, A.I. Traino, V.V. Rumiantsev and V.S. Yusupov</i> .....	53
<b>Distribution of Specific Force Across the Strip Width in the Roll Gap</b> <i>E. Nikitenko</i> .....	57
<b>Grinding of Finishing Mill Rolls Using CBN Grinding Wheels at Dofasco Inc., Hamilton</b> <i>A. Varghese, K. Kumar and P. Jackson</i> .....	65
<b>Analyze for the Issue of Decreasing the Loss of Temperature in Finished Rolling of Hot Rolling Stand*</b> <i>J.C. Xu</i> .....	77
<b>Roll Bite Lubrication for Steel Sheet Hot Rolling: Trends and Recent Developments</b> <i>J.E. Murphy and M.D. Zink</i> .....	79

## Third International Symposium on Railroad Tank Cars I

<b>The Physical Metallurgy of Normalized Plate Steels</b> <i>R.L. Bodnar, F.B. Fletcher and M. Manohar</i> .....	89
<b>Impact Resistance of Steel from Derailed Tank Cars in Minot, North Dakota</b> <i>F. Zakar</i> .....	111

<b>Effect of Nb on Weld Heat Affected Zone Toughness of Normalized C-Mn Tank Car Steel*</b>	
<i>G. Shah and P.G. Nash</i> .....	119

### **High Strain Rate Deformation and Deformation Mechanisms of Structural Steels I – Deformation Mechanisms and Microstructure Events**

<b>Deformation and Shear Band Development in an Ultrahigh Carbon Steel During High Strain Rate Deformation</b>	
<i>D. Lesuer, C. Syn and O. Sherby</i> .....	123
<b>Dynamic Torsional Properties of Ultra Fine Grained Low Carbon Steels Fabricated by Equal Channel Angular Pressing</b>	
<i>Y.-G. Kim, B. Hwang, S. Lee and D.H. Shin</i> .....	135
<b>A Novel Three-Point Bend Test for Dynamic Fracture Toughness Measurement</b>	
<i>K.S. Vecchio, F. Jiang and R.R. Adharapurapu</i> .....	141
<b>High Speed Deformation Behavior of Dual Phase Steel</b>	
<i>J. Qu, W. Dabboussi, J. Nemes and S. Yue</i> .....	153
<b>Plastic Deformation and Fracture of Steels under Dynamic Biaxial Loading</b>	
<i>C.K. Syn, J.C. Moreno, D.M. Goto, J.F. Belak and D.E. Grady</i> .....	163
<b>Influence of Prestraining and Microstructure on the Dynamic Properties of High Strength Sheet Steels</b>	
<i>P. Larour, P. Verleysen, M. Vermulen, M.A.R. Gomes, A. Weidermeier, J.-L. Geoffroy and W. Bleck</i> .....	171

### **Precipitation in Steels II – Physical Metallurgy and Property Development: Phase Transformation**

<b>Dilatometric Investigations on the Decomposition of Austenite in Two Medium Carbon Steels Respectively With and Without Cr and Mo Additions</b>	
<i>A. Mertens, A.J. Brown, L. Zhao, J.R. McDermid, S. van der Zwaag and J. Sietsma</i> .....	187
<b>Ferrite Nucleation on Ce-Onysulphide Inclusions in Low Alloyed Steels</b>	
<i>C. Van der Eijk, I. Lassila, O. Grong, O.S. Klevan and L. Holappa</i> .....	199
<b>Graphitization of Medium Carbon Steel</b>	
<i>K. He, D.V. Edmonds, M.J.W. Green and P.E. Reynolds</i> .....	207
<b>Heterogeneous Precipitation in Steels</b>	
<i>K.C. Russell</i> .....	217
<b>Ferrite Nucleation and Growth in Medium Carbon Steel Studied by 3DXRD Microscopy</b>	
<i>S.E. Offerman, A.C.P. van der Zijden, N. van Dijk, J. Sietsma, E.M. Lauridsen, L. Margulies, S. Grigull, H.F. Poulsen and S. van der Zwaag</i> .....	227
<b>Microstructure and Texture Evolution of a 0.04%C Steel Subjected to an Isothermal Annealing</b>	
<i>I. Millan, A.L. Rivas, J.M. Carbera, S. Camero and J. Machado</i> .....	235

### **Product Application and Development**

<b>Environment Degradation of Martensitic Stainless Steels for Transmutation Applications</b>	
<i>A.K. Roy, P.P. Gudipati and V. Selvaraj</i> .....	249

<b>Investigation of Conditions of Formation of Cross-Sectional Wall Thickness Non-Uniformity in Tubes in the Fixed Plug Drawing Process</b>	
<i>G.I. Gulyayev, Y.G. Gulyayev, Y.I. Shyfrin, S.A. Chumasov, N.Y. Kvitka, D.Y. Garmashev and C.V. Darragh</i> .....	257
<b>The Effect of Boron on Low Carbon Rods and Galvanized Wires</b>	
<i>A. Wallace, A. Brownrigg, P. Hodgson and L. Frawley</i> .....	275
<b>Application of TRIP and Dual Phase Steels for Enhanced Durability of a Shock Tower Assembly</b>	
<i>R.M. Iyengar, S. Laxman, C. Roche and M. Amaya</i> .....	287
<b>Effect of Initial Texture on the Texture Evolution of IF Steel</b>	
<i>G. Kim, K. Lee and H.-T. Jeong</i> .....	303

### **Roll Technology II – Cold and Hot Mill Rolls**

<b>Back-Up Roll Chamfer Design, Profile and Maintenance</b>	
<i>F. Decultieux, M. Hoffman and T. Adams</i> .....	311
<b>Forged Semi-HSS Grade for Work Rolls Dedicated to Cold Rolling of Silicon Steel</b>	
<i>C. Gaspard, T. Adams and J. Ballani</i> .....	323
<b>Use of HSS Rolls to Skip the Chrome Plating in Cold Rolling Applications</b>	
<i>C. Gaspard, J. Ballani, D. Batazzi and T. Adams</i> .....	329
<b>The Properties and Usage Research of Integrated Enhanced ICDP Work Rolls Made by Local Roll Maker for Hot Rolling</b>	
<i>P. Hui, F. Yurio and Z. Shougang</i> .....	339
<b>FAQs About Hot Strip Mill Work Rolls</b>	
<i>K.H. Schroeder</i> .....	349
<b>New Roll Technologies and Roll Design Improvements in Tata Steel</b>	
<i>U. Singhal</i> .....	361
<b>History of High Speed Steel Rolls in Japan</b>	
<i>H. Sorano, N. Oda and J.P. Zuccarelli</i> .....	379

### **Third International Symposium on Railroad Tank Cars II**

<b>Vertical Coupler Load Environment</b>	
<i>A. Prabhakaran and V. Sharma</i> .....	393
<b>Tank Car Steel Investigations</b>	
<i>R.D. Sims</i> .....	401
<b>Development of a Low Carbon HSLA Alternative to TC128 for Tank Car Application</b>	
<i>A. Bai, J. Dorricott, F. Hamad and S. Hansen</i> .....	407
<b>High Strength, Low Carbon, Ferritic, Copper-Precipitation Strengthening Steels</b>	
<i>S. Vaynman, M.E. Fine and S.B. Bhat</i> .....	417

## Use of Bainitic and Bainitic-Martensitic Steels in Current or Developing Applications

### Meeting Specification, Failing Expectations

*K. Sampath* ..... 425

### Hyper-Strength Bainitic Steels

*P.M. Brown and D.P. Baxter* ..... 433

### Microstructure and Hardness of Grade 9260 Steel Heat Treated by the Quenching and Partitioning (Q&P) Process

*F.L.H. Gerdemann, J.G. Speer and D.K. Matlock* ..... 439

### Comparison of Three Ni-Hard I Alloys

*O.N. Dogan, J.A. Hawk and J. Rice* ..... 451

## High Strain Rate Deformation and Deformation Mechanisms of Structural Steels II – Development and Application of High Strain Rate Properties

### Effect of Processing Parameters on the Deformation Behavior of Low Carbon Dual Phase Strip Steels at High Strain Rates

*N.D. Beynon, T.B. Jones and G. Fourlaris* ..... 459

### Deformation and Work Hardening of Cold Formed High Strength Steels at High Rates of Strain

*T. Vuoristo, V.-T. Kuokkala, M. Apostol, P. Peura, J. Tulonen and J. Pirttijoki* ..... 471

### Recently Developed Testing Techniques and Dynamic Tensile Properties of Steel Sheets for Automobiles

*S. Tanimura, M. Uemura, N. Kojima and T. Yamamoto* ..... 481

### The Effects of Strain Rate on the Deformation Behavior of High Strength IF and Bake-Hardenable Sheet Steels for Automotive Applications

*R.S. Kircher, A.K. De, D.K. Matlock and J.G. Speer* ..... 491

### Characterization of Strain and Strain Rate Histories in High Strength Steel During Asymmetric Tube Crush

*S. Simunovic, J.M. Starbuck, R. Boeman, D. Meuleman, and P.V.V. Nukala* ..... 499

### Initial Chip Formation of Structural Steels Caused by Very High Strain Rates During Micro-Machining Processes

*G.M. Robinson, M.J. Jackson and L. J. Hyde* ..... 511

## Precipitation in Steels III – Plant Metallurgy and Property Development: HSLA Steels: Cu-,Cr-Precipitation

### Recent Advances in High Strength, Low Carbon, Precipitation-Strengthened Ferritic Steel

*S. Vaynman, D. Isheim, M.E. Fine, D.N. Seidman and S.P. Bhat* ..... 525

### Precipitation in Ferrite During Isothermal Aging of X80 Steel

*Q. Wei, J. Qu, A.M. Elwazri, D. Gai and S. Yue* ..... 531

### Study of Precipitation Kinetics of Copper in HSLA Steel by Small Angle Neutron Scattering (SANS)\*

*C.S. Pande* ..... 541

### Effect of Carbide Formation on the Microstructure and Texture of Warm Rolled and Annealed Low Carbon Steels with Cr and B

*I.B. Timokhina, A.I. Nosenkov, J.J. Jonas and E.V. Pereloma* ..... 543

## Roll Technology III – Maintenance and Inspection

### **TOPOCROM® – A Superior Method to Texture Work Rolls**

*K. Müll, G. McLean, T. Bolch and M. Haissig* ..... 553

### **Roll Repair by Submerged Arc Welding**

*D. Hetzner* ..... 569

### **The Application and Benefits of New Saddle Type Roll Micrometer Technology**

*W.E. Mellander, D. Ganske and J.W. Boyd* ..... 581

### **Evolution of Roll Inspection Systems to Meet Changes in Roll Technologies and Roll Shop Practices**

*A.G. Payling* ..... 587

### **EDT—Roll Texturing Technology as a Base for Modern Surface Structures in Automotive Cold Mill Flat Products**

*M. Utsch and P. Vinke* ..... 599

### **Nickel Aluminide Intermetallic Alloy Rolls Energy Benefits – Summary of Large Scale Project and Update**

*A. Martocci, P. Angelini, M. Santella, V. Sikka and J. Mengel* ..... 609

## Precipitation in Steels IV – Physical Metallurgy and Property Development: Precipitation in High Alloyed Steels

### **Coarsening of Secondary Hardening Carbides in a Hot-Work Tool Steel – Experiments and Simulation**

*H. Leitner, P. Staron, M. Bischof, H. Clemens, E. Kozeschnik, J. Svoboda and F.D. Fischer* ..... 623

### **On the Precipitation Behavior of a Ni and Al Alloyed Martenitic Tool Steel**

*S. Erlach, F. Danoix, D. Lermarchand, H. Leitner, M. Bischof, I. Siller and H. Clemens* ..... 633

### **EFTEM Investigations on Precipitates in Creep Resistant 9-12% Cr Steels**

*A. Sonderegger, G. Kothleitner, W. Rechberger and H. Cerjak* ..... 643

### **Effect of Precipitation on Creep Properties of Certain Cast H-Series Austenitic Stainless Steels**

*G. Muralidharan, N.D. Evans, K.C. Liu, J.G. Hemrick, M.L. Santella, P.J. Maziasz, V.K. Sikka and R.I. Pankiw* ..... 651

## Primary Operations and Product Quality

### **Hot Ductility Improvement in the Peritectic Steel Containing Vanadium by Application of High Temperature Deformation**

*A. Rezaeian, F. Zarandi, D.Q. Bai and S. Yue* ..... 665

### **The Effect of Austenite Grain Size on Hot Ductility of Steels**

*S.-C. Moon and R. Dippenaar* ..... 675

### **Transient Casting Practices and Their Effects on Steel Cleanness at CSP, Port Talbot Works, UK**

*P. Thomas, A.H. Thomas and M. Jefford* ..... 685

### **Inside Morphology of Large Inclusions in Steel**

*L. Wang, L. Zhang and K. Qian* ..... 695

### **Inclusion Control in Tire Cord Steel**

*L. Zhang, Y. Wang, D. Zhou, X. Hu and K. Qian* ..... 703

## The Effects of Microstructure and Property Homogeneity/Variability on Product Performance I

### Texture Gradient of As-Cast Low Carbon Thin Steel Slab

*P. Xu, F. Yin and K. Nagai* ..... 717

### Subcritical Heat Treatment of Cold Rolled Multi-Phase TRIP Steel

*T. Jeong, E. Essadiqi and S. Yue*..... 725

### Influence of Grain Refinement on the Mechanical Properties of Dual Phase Steel

*O. Tsipouridis, C. Kremaszky, E. Werner, E. Tragl and A. Pichler*..... 735

### Recrystallization and Grain Size Control in Novel Interstitial Free (IF) Strip Steels

*S. W. Ooi and G. Fourlaris* ..... 747

## Development and Application of Hot Rolled Flat Products

### Some Physical Metallurgy Aspects of High Strength Hot Rolled Cb-Ti Microalloyed Steels with Superior Fracture Resistance and Formability

*H. Nathani, S. Shanmugan, R.D.K. Misra, J.E. Hartmann and F. Siciliano*..... 761

### Microstructure Evolution During Thermomechanical Testing in Novel IF Strip Steels

*S.L. Porter and G. Fourlaris*..... 773

### Recent Steel Developments in the Intergrated Technology of CSP

*C.-P. Reip, W. Hennig and R. Hagmann*..... 781

### Galvanizing of High Strength Hot Rolled Steels

*A. Voyzelle, S. Dionne, J. Li, E. Essadiqi, E. Baril, J.R. McDermid and F. Goodwin*..... 793

## The Effects of Microstructure and Property Homogeneity/Variability on Product Performance II

### Laser Ultrasonic Monitoring of Recrystallization of Steels

*S.E. Kruger, G. Lamouche, A. Moreau, J.-P. Monchalain and M. Militzer*..... 809

### Abnormal Grain Growth During Thermomechanical Processing of Ti Microalloyed Medium Carbon Steels

*R. Bueno, A. Echeverria, B. Lopez and J.M Rodriguez-Ibabe* ..... 813

### Thickness and Grain Size Sensor for On-line Seamless Steel Tubing Process Control

*G. Jeskey, R. Kolarik II, E.B. Damm, J.-P. Monchalain, G. Lamouche, S.E. Kruger, and M. Choquet* ..... 823

### A Diffusion Model for the Influence of Oxygen and Sulfur on the Non-Equilibrium Distribution of Chromium in Austenitic Stainless Steel Welds and Slabs

*M.F. McGuire* ..... 831

## Addendum

### Galvanizing of AHSS: Influence of the Surface and Sub-Surface of Si-, Al- and P-Alloyed TRIP-Aided Steel After Intercritical Annealing

*J. Mahieu, S. Claessens, B.D. De Cooman, and F. Goodwin* ..... 847

<b>Effect of Nb on Weld Heat Affected Zone Toughness of Normalized C-Mn Tank Car Steel*</b>	
<i>G. Shah and P.G. Nash</i> .....	119

### Continuous Casting Fundamentals I – Initial Solidification and Interfacial Phenomena

<b>Initial Solidification Behavior in Continuous Casting: The Effect of MgO on the Solidification Behavior of CaO-Al<sub>2</sub>O<sub>3</sub> Based Slags</b> <i>K. Prapakorn and A.W. Cramb</i> .....	3
<b>Analysis of Hook Formation Mechanism in Ultra Low Carbon Steel Using CON1D Heat Flow – Solidification Model</b> <i>H.-J. Shin B.G. Thomas, G.-G. Lee, J.-M. Park, C.-H. Lee and S-H. Kim</i> .....	11
<b>The Effect of Phase Diagram Information on Modeling Peritectic Reaction Rates</b> <i>N.J. McDonald and S. Sridhar</i> .....	27
<b>The Solidification Rate of Undercooled Pure Iron</b> <i>M.E. Valdez, H. Shibata, S. Sridhar and A.W. Cramb</i> .....	37
<b>The Effect of Surface Oxide Films on Heat Transfer Behavior in Strip Casting Process</b> <i>P. Nolli, D.-K. Choo and A.W. Cramb</i> .....	47
<b>Mold Slag Property Measurement to Characterize CC Mold – Shell Gap Phenomena</b> <i>Y. Meng, B.G. Thomas, A.A. Polycarpou, H. Henein and A. Prasad</i> .....	57
<b>Study of Free-Fluoride Mold Powder Based on Titanium-Bearing Blast Furnace Slag</b> <i>G.H. Wen, P. Tang, L. Zhang, Y. Liu and S. Miao</i> .....	69

### Modeling and Computer Applications in Metal Casting, Shaping and Forming Processes – Modeling and Computer Simulation I: Tube Making and Related Processes

<b>Improvement of Surface Finish in Steel Hot Rolling by Optimal Cooling Ahead of Entry into the Roll Gap: Numerical Analysis</b> <i>M. Krzyzanowski and J.H. Beynon</i> .....	77
<b>Analysis of Variation of the Mean Wall Thickness in Stretch Reduced Tubes</b> <i>G.I. Gulyayev, Y.G. Gulyayev, Y.I. Shyfrin, N.Y. Kvitka and K. Sawamiphakdi</i> .....	89
<b>Overview of 3D Finite Element Modeling in Tube Making Processes at the Timken Company</b> <i>K. Sawamiphakdi, D. Jin and T. Perez</i> .....	99
<b>Application of Computer Programs to Assist the Tooling Design for the Skew Rolling Process</b> <i>M. He and K. Sawamiphakdi</i> .....	113
<b>Accurate Temperature Measurement During Water Quench Operations Characterized by Boiling Water Heat Transfer</b> <i>D. Li, M. A. Well, S.L. Cockcroft, J.E. Ives and D. Jin</i> .....	125
<b>Process Modeling for Rotary Tube Piercing Application</b> <i>J. Yang, G. Li, W.-T. Wu, K. Sawamiphakdi and D. Jin</i> .....	137

## Continuous Casting Fundamentals II – Mold Fluid Flow and Water Spray Cooling

<b>A Physical Model Study for the Two-Phase Flow in a Continuous Casting Mold</b> <i>R. Sanchez-Perez, A. Ramos-Banderas and R.D. Morales</i> .....	149
<b>Inclusion Removal by Bubble Flotation in Continuous Casting Mold</b> <i>L. Zhang, J. Aoki and B.G. Thomas</i> .....	161
<b>Understanding the Role Water Cooling Plays During Continuous Casting of Steel and Aluminum Alloys</b> <i>J. Sengupta, B.G. Thomas and M.A. Wells</i> .....	179
<b>Comparison of Impact, Velocity, Dropsize and Heat Flux to Redefine Nozzle Performance in the Caster</b> <i>K.A. Tanner</i> .....	195
<b>Spray Cooling Results of Air/Mist Spray Nozzles with Reduced Air Volumes</b> <i>K. Kasperski</i> .....	203
<b>Optimization of the Water Rate in Secondary Cooling Zone of Continuous Casting Billet by Using Particle Swarm Optimization Algorithm</b> <i>R. Wu, G. Mei, H. Meng, and Z. Xie</i> .....	211

## Modeling and Computer Applications in Metal Casting, Shaping and Forming Processes II – Modeling and Computer Simulation: Thermal Treatment and Related Processes

<b>Data Needs for Modeling Heat Treatment of Steel Parts</b> <i>Z. Li, B.L. Ferguson and A.M. Freborg</i> .....	219
<b>Improving the Bend Fatigue Strength of Carburized Gears</b> <i>A.M. Freborg, Z. Li, B.L. Ferguson, and D. Schwam</i> .....	227
<b>A Technique to Extract Overall Kinetics of Metallurgical Changes from Macroscopic Behavior</b> <i>T.C. Tszeng</i> .....	235
<b>Multi-Scale Characterization of Shear Localization in Strip Cast AA5754 Aluminum Alloy Sheet</b> <i>J. Kang, M. Jain, D.S. Wilkinson and J.D. Embury</i> .....	249

## Engineered Steel Surfaces I – Corrosion Protection, Coatings, Scale

<b>Study of Surface Alloying of Steel During Hot Rolling*</b> <i>P.C. Maity</i> .....	261
<b>Nickel Flash: Cold Rolled Steel Sheet with Improved Phosphatability and Corrosion Resistance</b> <i>A. Kukuch and J. Rotole</i> .....	263
<b>Microwave Driven Pack Cementation Coating Process</b> <i>J.O. Kiggans, T.N. Tiegs, M.D. Losego and G. Muralidharan</i> .....	275
<b>Effects of Silicon Content and Cooling Rate on the Solidification Microstructure of Al-Zn Alloys</b> <i>A. Arizmendi, A. Salinas, F. Garcia, E. Nava, A. Mani and R. Garza</i> .....	281
<b>Formation of Intermetallic Compounds in Al-Zn-Si Liquid Alloys</b> <i>F. Garcia, A. Salinas, A. Arizmendi, E. Nava, A. Mani and R. Garza</i> .....	291

**Modeling and Computer Applications in Metal Casting, Shaping and Forming Processes III –  
Modeling and Computer Applications: Casting Processes**

<b>Molten Pool Size in Laser Cladding Simulated by Finite Element Method</b> <i>P. Nash , Z. Hu and G. Zhou</i> .....	303
<b>Importance of Heat Transfer Modeling at the Metal/Mold Interface in Solidification Simulation</b> <i>T.S.P. Kumar and H.C. Kamath</i> .....	313
<b>Computer Simulation of the Effect of Helium in the Permanent Mold Casting Process</b> <i>X. Wan and R.D. Pehlke</i> .....	323
<b>Study of Computational Issues in Simulation of Transient Flow in Continuous Casting</b> <i>Q. Yuan, B. Zhao, S.P. Vanka and B.G. Thomas</i> .....	333

**Engineered Steel Surfaces II – Nanotechnology, Hardness, Wear Resistance**

<b>Surface Hardening of Austenitic Steels by Low Temperature Colossal Supersaturation</b> <i>G.M. Michal, F. Ernst and Y. Cao</i> .....	347
<b>The Wear Characteristics of Electroless Ni-P-PTFE Composite Coatings*</b> <i>M. Haratian, M. Marandian M.M. Vaghefi and A. Saatchi</i> .....	355
<b>Surface Modification of 4340 Steel with Iron-Aluminides Using High Energy Density Processes</b> <i>G. Muralidharan, C.A. Blue, V.K. Sikka and N.B. Dahotre</i> .....	357
<b>Engineered Surfaces for Steel Rolling Element Bearings and Gears</b> <i>G.L. Doll, C.R. Ribaldo and R.D. Evans</i> .....	367

**Modeling and Computer Applications in Metal Casting, Shaping and Forming Processes IV –  
Modeling and Computer Applications: Shaping and Rolling Processes**

<b>A New Free Surface Prediction Technique for Finite Element Simulation of Shape Rolling</b> <i>H.J. Kim, T.H. Kim, W.Y. Choo and S.M. Hwang</i> .....	377
<b>Process Simulation for Industrial Rolling Applications</b> <i>D. Lambert, P.R. Jepson and J. Yang</i> .....	385
<b>Finite Element Model for Efficient Simulation of Ring Rolling</b> <i>Z. Malinowski, M. Glowacki, M.Pietrzyk and W. Madej</i> .....	397
<b>Sensitivity of Parameters of Backward-Forward Extrusion Test on Material Properties and Friction</b> <i>M. Pietrzyk, A. Zmudzki, D. Szeliga, and R. Kuziak</i> .....	403
<b>Development and Optimization of the Models for 2050 Hot Rolling Mill, Baosteel</b> <i>X. Shan, Z. Lao, J. Zhang and Y. Wu</i> .....	413
<b>Simulation of the Rolling Process of 4-High Hot Steel Strip Continuous Mills</b> <i>Y. Wang, Z. Cui and H. Liu</i> .....	419
<b>The Effect of Sample Shape on ECAP by Simulation</b> <i>R. Yuan, and T.D. Burleigh</i> .....	431
