MARCH 19–23, 2023
SAN DIEGO CONVENTION CENTER &
HILTON SAN DIEGO BAYFRONT
SAN DIEGO, CALIFORNIA, USA
#TMSANNUALMEETING

SUBMIT AN ABSTRACT BY JULY 1 FOR THE FOLLOWING TMS2023 SYMPOSIUM:

LIGHT METALS

Aluminum Waste Management and Utilization

The production of primary aluminum generates approximately 180Mt of process waste per annum. Managing the process waste effectively and ensuring minimal environmental and social impact is an integral part of the industry's social license to operate.

This symposium will look at a range of different solutions for waste management and utilisation across the global from lab to commercial scale. Papers are welcome on management, utilisation, or detoxification of: mine tailings, bauxite residue, spent pot lining management, dross, excess bath scrubber sludges, filter dust, and other wastes.

ORGANIZERS

Pernelle Nunez, International Aluminium Institute
Lavinia Kugaswaran, International Aluminium Institute

SYMPOSIUM SPONSORS

TMS Light Metals Division
TMS Aluminum Committee
