The First TMS Summit on Creating and Sustaining Diversity in the Minerals, Metals, and Materials Professions breaks new ground in introducing a series of events that are as unique as they are all-encompassing.

Who Should Attend:
• Early-career and mid-career professionals and leaders in the minerals, metals, and materials fields
• Professionals in government, industry, and academia
• Human resources professionals & Diversity Officers in science and engineering organizations

All Encompassing
If you can only attend one development training in 2014, DMMM1 should be your choice. This “all-in-one-place” event delivers professional development, leadership skills enhancement, and diversity/inclusion training.

Confirmed Speakers
• Linda Abriola, Tufts University
• Keith Bowman, Illinois Institute of Technology
• Dianne Chong, Boeing
• Julie Christodoulou, Office of Naval Research
• Mary Galvin, National Science Foundation
• Dawne Hickton, RTI International Metals
• Andrea Hodge, University of Southern California
• Katie Kosloski, Luck Stone
• Beth Lewis, PCC Forged Products
• Orlando Rios, Oak Ridge National Laboratory
• Linda Schadler, Rensselaer Polytechnic Institute
• Valerie Young, author of The Secret Thoughts of Successful Women: Why Capable People Suffer from the Impostor Syndrome and How to Thrive in Spite of It
• Jean Mavrelis and Thomas Kochman, co-authors of Corporate Tribalism: White Men/White Women and Cultural Diversity at Work
More to be added soon…

You Are a Part of the Solution
You will be a part of the solution with interactive, working sessions that harness the power of the group to identify challenges, strategies, resources, and recommendations.

Practical
You’ll hear from real people in real-world situations about what does and what doesn’t work, and you will leave the summit with what you need to make diversity happen in your environment. Outputs include:
• practical new skills
• practical new solutions
• a diversity toolkit, developed at the summit and available online by Fall 2014
• a final report of the summit, available online by Fall 2014

Register Today at:
www.tms.org/diversitysummit
At the First TMS Summit on Creating and Sustaining Diversity in the Minerals, Metals, and Materials Professions, you will experience a practical, solutions-oriented program. Beyond keynotes from leaders in the field and beyond theory, this summit provides professional development with practical application to help you sow seeds of diversity and leadership in government, academia, and industry and to harvest improvement in yourself and your organization.

You will learn from the experience of others who are in all career stages and a variety of professional environments. You will gain understanding of diversity topics better by hearing from experienced, internationally-known experts. You will get involved in interactive working sessions led by professional facilitators to identify key issues and make recommendations on how to improve diversity in the minerals, metals and materials professions.

It’s a meeting that is practical and authentic and gives you real tools for real issues. Your new skills and solutions will be packaged in a handy diversity toolkit and the key ideas of the group will be documented in a final report. These takeaways will enable you to return to your workplace and implement solutions that have been proven in real-world situations. You can avoid paths that do not deliver results, saving you time and effort.

The summit focuses on key diversity and inclusion challenges, solutions, and advice for everyone from early career professionals to leaders in the minerals, metals, and materials fields. This includes panel discussions and working sessions specifically designed for your career stage—early-career, mid-career, and leadership. You’ll also hear state-of-the-art thinking from well-known and respected experts in the field of diversity and inclusion topics and be offered professional development opportunities designed for anyone in the fields of science and engineering.

DMMM1 is the meeting for you if your responsibilities in government, industry, or academia include monitoring and/or ensuring diversity and inclusion. It is also for anyone who is experiencing or may experience inclusion challenges in their career.

Conference Organizers
- Elizabeth Holm, Carnegie Mellon University (Chair)
- Viola Acoff, University of Alabama
- Eliana Fu, Titanium Metals Corporation
- Mary Korpi, Newmont Mining Corporation
- Alexis Lewis, Naval Research Laboratory
- Kray Luxbacher, Virginia Tech
- Jonathan Madison, Sandia National Laboratories
- Michele Manuel, University of Florida
