WORKSHOP OVERVIEW

This course consists of a lecture and hands-on exercises intended for new or existing users of Avizo software. The material covered in the training will introduce advanced 3D visualization and processing solutions for materials analysis. The course will highlight the important features and unique functionality of Avizo. After a quick introduction, attendees will have the opportunity to ask questions, see live demonstrations, and use the Avizo software. **Attendees must bring their own PC with suitable 3D graphics board for course participation.** TMS will e-mail instructions about software distribution and installation up to one week in advance of the course. Temporary licenses will be provided.
