

Make Connections that Last: Join a TMS Technical Committee

One of the best ways to establish networking connections that will last far beyond TMS2017 is to attend a TMS technical committee meeting here in San Diego. TMS has more than 30 technical committees, and each one is made up of volunteers who guide the programming, publications, and other activities of the society in that subject area. By joining a committee, you'll be in regular contact with others working in your area of interest, stay up-to-date on the latest advances in your field, and open the door to countless opportunities for involvement in TMS.

Below is an alphabetical listing of technical committee meetings that will take place this week. All TMS members are welcome to attend technical committee meetings as a guest. (As an attendee of TMS2017, TMS membership was included in your conference registration fee.) Please select the committee that best matches your interest area and join us! Be sure to tell the committee chair that you would like to become a committee member.
