San Diego, California, USA

FRONTIERS IN MATERIALS SCIENCE, ENGINEERING, AND TECHNOLOGY: AN FMD SYMPOSIUM IN HONOR OF SUNGHO JIN

This symposium honors Professor Sungho Jin, winner of the 2016 Acta Materialia Gold Medal Award. It will address frontiers in materials science, engineering, technology, and beyond, including recent advancements in electronic, magnetic, optical, superconducting materials, devices and structures, electronic packaging, microelectromechanical systems (MEMS) materials and devices, nano-bio materials, and energy-related materials.

This special symposium is dedicated to the seminal research contributions of Sungho Jin and to his leadership in materials science worldwide through various professional societies and the University of California, San Diego (UCSD). Jin is professor emeritus at UCSD. Prior to his recent retirement, he was Distinguished Professor of Materials Science in the Departments of Mechanical and Aerospace Engineering at UCSD and held the Iwama Endowed Chair. He also served as the director of the university-wide Materials Science & Engineering Program at UCSD for 13 years.

ORGANIZERS

Fay Hua, Intel Corporation, USA

Tae-Kyu Lee, Portland State University, USA

Roger Narayan, University of North Carolina at Chapel Hill/North Carolina State University Joint Department of Biomedical Engineering, USA

Choong-un Kim, University of Texas at Arlington, USA

Nuggehalli M. Ravindra, New Jersey Institute of Technology, USA

PROCEEDINGS PLANS

Selected papers from this symposium may be published in the TMS journal, *Journal of Electronic Materials*.

SYMPOSIUM SPONSOR

TMS Thin Films and Interfaces Committee

TMS Nanomaterials Committee

TMS Electronic Packaging and Interconnection Materials Committee

TMS Biomaterials Committee
