

JOIN THE ENGINEERING COMMUNITY AT UW-MADISON

An Assistant Professor position is waiting for you in the
Department of Materials Science & Engineering

**The Department of Materials Science & Engineering
invites applications for a tenure-track faculty position in metallurgy**

UW-Madison is home to world-class, collaborative research efforts across materials, including in metals, electronic and optical materials, nanomaterials, advanced manufacturing, and polymers and biomaterials. We are also home to cutting edge facilities for materials synthesis, characterization, and computation at the department, college, and campus level. We seek new faculty members in the area of metallurgy. Areas of interest include alloy design, metals sustainability, synthesis and processing, and metals in extreme environments. New faculty will have the opportunity to collaborate with leading research programs in high-temperature materials, corrosion, nuclear materials, and advanced manufacturing. The successful candidate will develop a world-class research program, teach undergraduate and graduate students, and engage in professional and public service.

Application deadline: December 15, 2021
