Manuscript Deadline: *October 1, 2019*

Additive Manufacturing: Validation and Control

While research continues on the fundamental aspects of AM, it is the ability to produce repeatable properties and microstructures that is required to incorporate AM as a primary manufacturing process. Modeling and simulation strategies are being developed to provide benchmarks for the validation and control of the AM process. Manuscripts are solicited that address approaches toward validating process modeling and incorporation into process control.

Original research papers should be 3,000-6,000 words with up to 8 figures maximum; review papers should be 6,000-10,000 words with up to 15 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: **Additive Manufacturing; Advanced Processing; Characterization; Joining; Mechanical Properties; Phase Transformations; Physical Properties; Recycling and Secondary Recovery**

Guest Editor(s): **Judy Schneider:**
jah0094@uah.edu

Committee Sponsor(s): **Additive Manufacturing**

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
