Manuscript Deadline: *August 1, 2021*

New and Novel Laboratory and Pilot Techniques for Pyrometallurgy

Laboratory and pilot testing is critical for advancing our understanding of pyrometallurgical processes. Due to advances in analytical techniques and our understanding of pyrometallurgy, laboratory and pilot testing is advancing as well. This topic focuses on describing new and novel piloting and laboratory techniques, illustrating their use and the advances that have been made.

Original research papers should be 3,000-6,000 words with up to 8 figures maximum; review papers should be 6,000-10,000 words with up to 15 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: **Extraction and Processing; Iron and Steel; Pyrometallurgy**

Guest Editor(s): **Stuart Nicol and Will Hanneman:**
stuart.nicol1@glencore.com.au; will.hannemann@glencore.com.au

Committee Sponsor(s): **Pyrometallurgy**

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
