Manuscript Deadline: *April 1, 2022*

Furnace Tapping (By Invitation Only)

Tapping a pyrometallurgical smelter is not an easy task and a well-managed tapping process is essential for safe furnace operations. Draining of metal and slag is as important as maintaining a closed tap-hole. From a furnace containment perspective, the tap-hole area is one of the high wear, and therefore high risk as tap-hole failures can have devastating impacts on smelter operations. This invitation-only topic will present a multi-disciplinary picture of the tapping of furnaces.

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:

<http://www.tms.org/AuthorTools/>

Keywords for this topic: *Extraction and Processing; Pyrometallurgy*

Guest Editor(s): *Joalet Steenkamp and Quinn Reynolds:*
JoaletS@mintek.co.za; QuinnR@mintek.co.za

Committee Sponsor(s): *Pyrometallurgy*

If you are interested in submitting a paper, upload your manuscript at <https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
