Health, Safety and Environmental Sustainability in Aluminum Recovery

Nowadays, both the aluminum industry and scientific research are aiming to create a low-carbon, energy-efficient, and sustainable process with high health and safety standard. This topic covers recycling of aluminum (and its alloys), with a specific focus on managing the health safety and environmental issues for secondary aluminum production. Authors are kindly requested to contribute manuscripts in the relevant areas of aluminum production and recycling.

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: Aluminum; Recycling and Secondary Recovery; Safety

Guest Editor(s): Anne Kvithyld and Hong Peng:
anne.kvithyld@sintef.no; h.peng2@uq.edu.au

Committee Sponsor(s): Aluminum

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
