Bauxite to Aluminum: Automation, Data Analytics and New Processes

This topic covers automation and data analytics, fostered by developments and implementations of Industry 4.0, and also new processes or engineering technologies used throughout the whole primary aluminum production chain, from bauxite to aluminum. Papers invited are those focusing on novel developments aiming to improve those processes, or on scientific/innovative approaches within these areas

Original research papers should be 3,000-6,000 words with up to 8 figures maximum; review papers should be 6,000-10,000 words with up to 15 figures maximum.

Detailed author instructions are available at:
http://www.tms.org/AuthorTools/

Keywords for this topic: Aluminum; Electrometallurgy; Hydrometallurgy; Pyrometallurgy

Guest Editor(s): Jayson Tessier and Hong Peng:
Jayson.Tessier@alcoa.com; h.peng2@uq.edu.au

Committee Sponsor(s): Aluminum
