

JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: *October 2023*

Manuscript Deadline: *April 1, 2023*

Advanced Materials for Additive Manufacturing

As additive manufacturing (AM) technologies advance and evolve, there is an increasing demand for the development of new materials for AM, including those tailored to specific AM processing histories, and those tailored for novel applications. This special topic covers recent advancements in the design, development, use, and characterization of new materials, including material gradients, in AM for a range of material classes including metals, ceramics, polymers, and composites.

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: **Additive Manufacturing; Alloy Phases; Characterization; Computational Materials Science & Engineering; ICME**

Guest Editor(s): Allison Beese and Antonio Ramirez:
amb961@psu.edu; ramirez.49@osu.edu

Committee Sponsor(s): Additive Manufacturing

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
