

JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: *August 2025*

Manuscript Deadline: *February 1, 2025*

Membrane Application in Hydrometallurgical Processing

The use of membrane technology is well-stated for water and wastewater treatment. Recently, the search for new processes to recover critical metals from aqueous processing shed light on the potential application of techniques using membranes. This special topic includes but is not limited to electrodialysis, supported liquid membranes, polymer included membranes, and Donnan dialysis for the separation of Li, Cu, Ni, Co, Fe, rare earth elements, and H₂SO₄. This special topic seeks high-quality works focusing on the latest novel advances in membrane technology for liquid-liquid separation.

Original research papers should be 3,000-9,000 words with up to 12 figures maximum; review papers should be 6,000-11,000 words with up to 20 figures maximum.

Detailed author instructions are available at:
<http://www.tms.org/AuthorTools/>

Keywords for this topic: *Extraction and Processing; Hydrometallurgy; Recycling and Secondary Recovery; Supported Liquid Membrane; Polymer Inclusion Membrane; Electrodialysis*

Guest Editor(s): *Amilton Botelho Junior, Hong Peng, Jihye Kim and Gisele Azimi:*

amilton.barbosa20@gmail.com; h.peng2@uq.edu.au; jihyekim@mines.edu; g.azimi@utoronto.ca

Committee Sponsor(s): *Recycling and Environmental Technologies; Hydrometallurgy and Electrometallurgy*

If you are interested in submitting a paper, upload your manuscript at
<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
