

JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: *November 2018*

Manuscript Deadline: *June 1, 2018*

The Surface Engineering Committee is seeking papers on the topic of
Surface Engineering for Improved Corrosion or Wear Resistance

Corrosion and wear are surface phenomena and therefore surface engineering have been used to improve both properties. Coatings, surface alloying, gradient structures, nanocrystallization, and inhibitors have been applied to tailor the surfaces for improved corrosion and wear resistance. This special topic focuses on capturing recent advancements in: 1) surface engineering technologies to improve corrosion and/or wear resistance and 2) theoretical understanding of corrosion and/or wear behavior of the surfaces.

Typical paper length is 5,000 to 6,500 words for review papers, and 2,400 to 4,000 words for original papers.

Detailed author instructions are available at:

<http://www.tms.org/AuthorTools/>

Guest Editors for this JOM topic are Rajeev K. Gupta, Sandip Harimkar, and Kristen Williams:

rgupta@uakron.edu; Sandip.Harimkar@okstate.edu;

kristen.s.williams@boeing.com

If you are interested in submitting a paper, upload your manuscript at

<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review.

Submission does not guarantee acceptance.
