

JOM Call for papers

An official publication of The Minerals, Metals & Materials Society

Publication Date: *June 2018*

Manuscript Deadline: *January 1, 2018*

The Shaping and Forming Committee and the Steels Committee are seeking papers on the topic of
Shaping & Forming of Advanced High Strength Steels

This invited topic spotlights the numerous advances in the experimental and computational methods used for constitutive analyses and improves our knowledge of the mechanical and metallurgical responses of advanced high strength steels to complex sheet forming processes. This includes increasing the understanding of the relationships between complex microstructures and mechanical behavior, as well as the relative influences of strain path and temperature on formability and failure.

Typical paper length is 5,000 to 6,500 words for review papers, and 2,400 to 4,000 words for original papers.

Detailed author instructions are available at:

<http://www.tms.org/AuthorTools/>

Keywords for this topic:

Iron and steel, mechanical properties, modeling and simulation, shaping and forming

Guest Editor for this JOM topic is Kester Clarke:

kclarke@mines.edu

If you are interested in submitting a paper, upload your manuscript at

<https://www.editorialmanager.com/jomj/>

Please note that all submissions will be subject to peer review. Submission does not guarantee acceptance.
