Supplemental Proceedings: Volume I: Materials Processing and Properties

Fatigue: Mechanisms, Theory, Experiments and Industry Practice

An Electron Microscope Study of Low-Cycle Fatigue In a High Niobium Containing and Precipitation Hardend Tial Alloy.................................................................25  
  F. Appel, T. Heckel, and H. Christ

Acoustic Effects on Cyclic-tension Fatigue of Al-4Cu-1Mg Alloy by Ultrasonic Shear Wave Methods..........................33 
  H. Yamagishi, M. Fukuhara, and A. Chiba

Fatigue Mechanism and Multistage Fatigue Modeling for Wrought Mg-3al-1zn ........................................41 
  Y. Xue, A. Pasco, and M. Horstemeyer

Effect of Microstructure on the Mechanical Behavior of B-Modified Ti-6Al-4V Alloys.................................49 
  I. Sen, and U. Ramamurty

Effect of Varying Elasticity of Helical Gear Teeth on Loading and Stressing................................................55 
  A. Elkholy

Fatigue Life Estimation for Tank Vehicle Structures Subjected to Liquid Sloshing...........................................61 
  L. Dai
Fatigue Crack Propagation in New Generation Aluminum-lithium Alloys..............................................................69
   S. Richard, C. Sarrazin-Baudoux, and J. Petit

Combination of Safe Life and Fail Safe Concepts to Assess the Lifetime of Ti-6Al-4V Forgings .........................77
   B. Oberwinkler, H. Leitner, and M. Riedler

Creep Fatigue Behavior at High Temperature of a Udimet 720 Nickel-base Superalloy ...........................................85
   T. Billot, P. Villechaise, M. Jouiad, and J. Mendez

## Supplemental Proceedings: Volume I: Materials Processing and Properties

### Materials for High Temperature Applications: Next Generation Superalloys and Beyond

- On the Different $\gamma$-$\gamma'$ Behaviors over the Dendritic Structure of the New Generation Ni-Base Single Crystal Superalloy MCNG...........................................................141
  
  *M. Arnoux, X. Milhet, J. Mendez, and F. Vogel*

- Thermodynamical Considerations for Applying the Halogen Effect to Ni-Base Superalloys......................................................149
  
  *H. Zschau, P. Masset, D. Renusch, and M. Schütze*

- First Principles Design of Ductile Refractory Alloys: Ductility Criterion..............................................................157
  
  *M. Gao, O. Dogan, and P. King*

- NbTiSiMo-X Alloys – Composition, Microstructure Refinement and Properties...........................................................165
  
  *Y. Kim, M. Sarath, and C. Woodward*

- Microstructural Engineering of Mo-Si-B Alloys Produced using Nitride-based Reactions ..............................................177
  
  *M. Middlemas, J. Cochran, and A. Gokhale*

- Hf Addition by Sputtering in b-NiPtAl Bond Coating for TBC Systems and its Effect on Thermal Cycling Behaviour ..........................................................185
  
  *A. Put, D. Oquab, J. Nicholls, and D. Monceau*
Cyclic Oxidation Behavior of Multilayer NiCrAlYSi/Ru-Al Coatings on the DZ125 Superalloy ...............................................................193
   L. Chen, L. He, and Q. Feng

Lifetime Prediction of Thermal Barrier Coatings Using Computational, Experimental and Non-Destructive Tools ................................................203
   A. Luz, D. Balint, and K. Nikbin

Fluorine Treatment for Improved Adherence of Eb-Pvd Thermal Barrier Coatings on Tial Alloys .............................................................211
   A. Donchev, R. Braun, and M. Schütze

A Study on Flow Behaviors of Alloy IC10 over a Wide Range of Temperatures and Strain Rates .........................................................219
   H. Zhang, W. Wen, H. Cui, and Y. Xu

Development of Heat Treatment for a Powder Metallurgy Nickel-base Superalloy .................................................................227
   G. Tian, C. Jia, F. Yin, and B. Hu

Effects of Cr on the Stress Rupture of Ni-Based Single Crystal Superalloys .................................................................233
   J. Chen, B. Zhao, L. Cao, and Q. Feng

Microstructure and Mechanical Properties of Directionally Solidified Castings Processed by HRS and LMC ...........................................241
   W. Tang, S. Jian, J. Zhang, L. Lou, and D. Wang

Structure, Chemical Stability and Properties of NiAl-Al2O3 Interface Modified by MAX-Phase Interlayer ......................................................249
   W. Hu, J. Song, Y. Zhong, and G. Gottstein
Interface Structure and Chemical Stability of Continuous Mo Wire Reinforced NiAl Composites .....................257
   J. Song, W. Hu, and G. Gottstein

Crack Growth Behavior of Alloy 276 as Functions of Temperature and Load Ratio ..............................................265
   J. Pal, M. Hasan, and A. Roy

Effects of Cyclic Loading, Temperature and Load Ratio on Plastic Deformation of Alloy 617 ...............................273
   M. Hasan, J. Pal, and A. Roy

Time and Temperature Dependent Deformation of Alloy 617 ..............................................................................281
   M. Hasan, J. Pal, A. Roy, and S. Chatterjee

Microstructure and Mechanical Properties of Direct Aged 718plus® Alloy .........................................................289
   E. McDevitt, J. Bentley, and W. Cao

Aging Effects on the High Temperature Tensile Behavior of Inconel 718 Superalloy .............................................297
   H. Bor, C. Wei, C. Kuo, Y. Yang, and C. Tai

TEM Observation of Ti-47Al-2Cr Alloy, Refined by Cyclic Heat Treatment .........................................................307
   H. Shakoorian, S. Heshmati-manesh, M. Nili-ahmadabadi, and H. Armaki

The Effect of Thermal Exposure on the Microstructure and Properties of a RENE-80 Superalloy ...............................315
   S. Farahany, and M. Aghaie-Khafri

Temperature Dependent Elastic Constants of Directionally Solidified Superalloys ...........................................323
   C. Kuo
Author Index ........................................................................................625
Subject Index .......................................................................................629
TABLE OF CONTENTS
Supplemental Proceedings: Volume I: Materials Processing and Properties

Materials Issues in Additive Powder-Based Manufacturing Processes

Design and Production of Bone Scaffolds with Selective Laser Melting ...............................................................333
  S. Bael, B. Vandenbroucke, G. Kerckhofs, J. Schrooten, and J. Kruth

Layered Manufacturing of Metallic Cellular Materials via Three-Dimensional Printing of Spray-Dried Metal Oxide Powder ..........................................................341
  C. Williams, J. Cochran, and D. Rosen

Direct Digital Manufacturing with Layer-by-Layer Melt Deposition Processes ...........................................................351
  K. Cooper, and S. Lambrakos

Structure-Property-Process Optimization in the Rapid-Layer Manufacturing of Ti-6Al-4V Components by Electron Beam Melting ......................................................363
  S. Gaytan, L. Murr, E. Martinez, D. Hernandez, S. Quinones, F. Medina, and R. Wicker

Spheroidisation and Oxide Disruption Phenomena in Direct Selective Laser Melting (SLM) of Pre-alloyed Al-Mg and Al-Si Powders ..........................................................371
  E. Olakanmi, R. Cochrane, and K. Dalgarno
Metallic Parts Fabrication with the Selective Inhibition Sintering (SIS) ............................................................. 381
   B. Khoshnevis, M. Yoozbashizadeh, and Y. Chen

Experimental analysis of porosity formation in laser-assisted powder deposition process .................................................. 389
   L. Wang, P. Pratt, S. Felicelli, H. Kadiri, and P. Wang

Impact of Physical Phenomena during Selective Laser Melting of Iron Powders ............................................................. 397
   M. Rombouts, J. Kruth, and L. Froyen

Spatial Control of Crystal Texture by Laser DMD Process ................................................................................................. 405
   J. Choi, J. Mazumder, and B. Dutta

Cold Sprayed Aluminum and Aluminum Alloy Coatings ................................................................................................. 413
   S. Wang, L. Xue, and J. Jiang

Effect of Oxide Dopants on Densification, Microstructure and Mechanical Properties of Alumina-mullite Ceramic Foams Prepared by the Polymeric Sponge Method ............................................................. 421
   X. Jin, F. Zhou, S. Deng, J. Li, and Y. Liu

Uniform-Droplet Spray Forming of Mg97Zn1Y2 Alloy ......................................................................................................... 431
   H. Fukuda, P. Wang, H. Sun, P. Wong, C. Doumanidis, and T. Ando

Author Index ........................................................................................................................................................................ 625

Subject Index ........................................................................................................................................................................ 629

**Supplemental Proceedings: Volume I: Materials Processing and Properties**

## Mechanical Behavior of Nanostructured Materials

- Deformation Behaviour of Nanocrystalline Pd Studied in Conditions of High Pressure Torsion Loading .................................................................441  
  *J. Ivanisenko, J. Weissmüller, and H. Fecht*

- Micro-scratch Characterization of Strength in Nanocrystalline Metals ........................................................................................................449  
  *L. Nyakiti, and A. Jankowski*

- Synthesis of Bulk Nanolaminate Materials with Accumulative Roll Bonding .................................................................455  
  *R. Hebert, G. Marathe, and J. Suri*

- Dislocation Nucleation inside Nanoscale Ribbons in Composite Microwires and the Importance for Determining Composite Strength .................................................................463  
  *D. Morris, and M. Muñoz-Morris*

- Intelligent Viscoelastic Polyurethane Intrinsic Nano Composites ........................................................................................................471  
  *M. Khan*

- Phase Transformation and Recrystallization during Creep of a Nanostructured Intermetallic TiAl Alloy .........................479  
  *F. Appel, J. Paul, and M. Oehring*
Performance Comparisons of Nanocrystalline Copper Fabricated by Room-temperature-molding and Vacuum-warm-compaction Method .................................................. 487
   W. Liu, T. Yang, G. Chu, and W. Liu

Nanocrystalline Powder Consolidation in AA2124 using Uniaxial Compaction and Severe Plastic Deformation ........................................................................................................... 495
   H. Salem, A. Sadek, and M. Attallah

Mechanical Properties and Nanocrystallization Behavior of Al-Ni-La Alloys ................................................................................................................................. 503
   R. Sahu, S. Chatterjee, and K. Sahoo

Simulation and Mechanical Characterization of Open Celled Foams from MicroCT Scan Data ................................................................. 511
   B. Notarberardino, B. Walker, and P. Young

Nano Crystal Surface Modification Technology and it's Effects on Fatigue, Wear and Friction Characteristics ............................................................... 517
   Y. Pyun, I. Cho, and J. Park

Author Index .......................................................................................................................................................... 625

Subject Index ....................................................................................................................................................... 629

## Supplemental Proceedings: Volume I: Materials Processing and Properties

### Surface Structures at Multiple Length Scales

- Hydrogen Transport in Fe/Ti Nanometer-scale Multilayers during In-situ Low Temperature Annealing ................................................... 567  
  
  Z. Wu, B. Cao, J. Gao, T. Peng, and M. Lei

- Synthesis and Characterization of Boron Carbide Thin Films Grown by RF Sputtering ........................................... 573  
  
  T. Tavsanoglu, S. Labdi, and M. Jeandin

- Modulated Epitaxial Growth of Fe/Cu Nanometer-scale Multilayers on Si Substrates Deposited by Magnetron Sputtering ........................................... 581  
  
  J. Gao, Z. Zhang, Z. Wu, and M. Lei

- Study of Nano-TiN/Ni Composite Coating on Aluminum Alloys Strengthened by Plasma Transferred Arc ...... 587  
  
  S. Qian

- Preparation of Carbon Foam Electrodeposited with Lead for the Application on Positive Current Collector for Lead Acid Batteries ........................................... 593  
  
  L. Ma, B. Chen, Y. Chen, and Y. Pan

- Surface Morphology of Precious-metal Free Copper Electroless Plating Process Carbon Fiber ........................................... 601  
  
  D. Che, W. Kang, G. Yao, Z. Cao, and H. Zhang
Synthesis and Electrochemical Properties Characterization of SnO2-coated LiNi1/3Co1/3Mn1/3O2 Cathode Material for Lithium Ion Batteries..................................................607
   P. Yang, C. Zhang, J. Zhan, Y. Fan, and J. Wu

Formation of Zn-Ca-Ni Tri Cation's Phosphate Coating on Steel and Study that Properties...............................615
   M. Zareii, and A. Afshar

Author Index ..................................................................................................................625

Subject Index ................................................................................................................629
