

# ENERGY MATERIALS 2026

4TH WORLD CONFERENCE ON  
ENERGY MATERIALS  
ORGANIZED BY CSM AND TMS

FEATURED AT

TMS SPECIALTY  
CONGRESS 2026

JULY 6-10, 2026  
ANAHEIM MARRIOTT  
ANAHEIM, CALIFORNIA, USA

**SUBMIT AN ABSTRACT BY DECEMBER 1, 2025**

Energy Materials 2026 is a premier international conference jointly organized by the Chinese Society for Metals (CSM) and The Minerals, Metals & Materials Society (TMS). Held every three years and alternating between China and the United States, this distinguished event brings together leading researchers, engineers, and industry professionals to share groundbreaking advances in materials for energy generation, storage, and sustainability.

Topics will span fundamental science to applied engineering, addressing global challenges in energy sustainability, efficiency, and innovation.

Key technical topics include:

- Materials for Advanced Ultra-Supercritical Power Systems
- Materials for Nuclear Energy
- Materials for Gas Turbines
- Materials for Oil and Gas
- Materials for Hydrogen Energy and Fuel Cell
- Structural and Functional Material for Renewable Energy & Energy Storage

## ORGANIZERS

### TMS

- Chair: **Xingbo Liu**, West Virginia University
- **Bai Cui**, University of Nebraska, Lincoln
- **Ziqi Sun**, Queensland University of Technology

### CSM

- Chair: **Zhiling Tian**, Executive Vice President of CSM
- **Hansheng Bao**, China Iron & Steel Research Institute Group Co., Ltd.
- **Xikou He**, China Iron & Steel Research Institute Group Co., Ltd.
- **Chengjia Shang**, University of Science and Technology Beijing (USTB)
