LIGHT METALS

ALUMINA & BAUXITE

The Alumina & Bauxite Symposium, along with Aluminum Reduction Technology, Electrode Technology for Aluminum Production, Cast Shop Technology, and Aluminum Alloys, Processing, and Characterization collectively form the Light Metals Symposium. This is an excellent opportunity to interact with experts from the light metals industry and academia from all over the world and get the latest update on key issues in the industry.

Based on the importance of improving processes, reducing environmental impact, and the global challenges in aluminum production, you are invited to submit papers on fundamental and applied research in the following subject areas:

- Changes in bauxite supply and future demands
- Bauxite ore characterization
- Bauxite mining and processing
- Handling and processing
- Sustainability and environmental issues
- Bauxite residue handling and opportunities
- Automation and process control
- Cost reduction strategies
- Alumina quality and properties (common session with Aluminum Reduction Technology Symposium)
