TMS2019 Highlights

Manufacturing the Circular Materials Economy

Plan now to be part of the 6th installment of the transdisciplinary conference that showcases research and progress at the intersection of material science, metallurgy, and sustainability.

Topics include:

- Disruptive Material Manufacturing: A Systems Perspective
- Secondary and Byproduct Sources of Strategic Materials and Minerals
- Electronic Waste Recycling
- Rethinking Production
- Education and Workforce Development

Visit www.tms.org/TMS2019 for details.

New! Lightweight Metals Programming

The German Metals Society (DGM) and TMS are joining their expertise to offer new programming that examines the latest developments in research, design, and manufacturing of metals that address the escalating global demand for weight savings.

Bladesmithing Is Back

... And It's Not Too Early to Plan

The TMS Bladesmithing Competition returns for its third hotly contested installment at TMS2019. Cash prizes and professional recognition await the student teams who claim the top spots for producing a blade by hand hammering or trip hammer forging, along with compelling presentation of the science behind their entries.

Space for entries is limited, so start organizing your team now! Rules, competition details, and important submission dates are now available at www.tms.org/Bladesmithing.
