LIGHT METALS

**Cast Shop Technology: Energy Joint Session**

Cast Shop Technology, along with Aluminum Reduction Technology, Aluminum Alloys, Processing and Characterization, Electrode Technology for Aluminum Production, and Alumina & Bauxite collectively form the Light Metals topic area at the TMS Annual Meeting & Exhibition. The meeting is an excellent opportunity to interact with experts from the light metals industry and academia from all over the world and hear the latest updates on key issues in the industry.

The aluminum industry faces unique challenges in the transition to sustainability, and efficient use of energy will play a key role. This joint session will explore the trends and drivers toward sustainability.

Papers are encouraged with research or case studies in furnace efficiency including energy savings, increased production, and reduced melt loss.

**ORGANIZERS**

Pierre-Yves G. Menet, Constellium Technology Center, France  
Mark Roderic Jolly, Cranfield University, United Kingdom  
Valmiro C. Sa Neto, Praxair Inc, USA  
Cynthia K. Belt, Metals Energy Management LLC, USA
