Electronic Materials

Phase Stability, Phase Transformations, and Reactive Phase Formation in Electronic Materials XIX

This is the 19th in a series of TMS symposia addressing the stability, transformation, and formation of phases during the fabrication, processing, and utilization of electronic materials and devices. Topics of interests range from microelectronic technologies to advanced energy technologies, including phase stability, transformation, formation, and morphological evolution of electronic packaging materials, interconnection materials, integrated circuit materials, optoelectronic materials as well as energy storage and generating materials.

ORGANIZERS
Hiroshi Nishikawa, Osaka University, Japan
Shi-Kang Lin, National Cheng Kung University, Taiwan
Chao-Hong Wang, National Chung Cheng University, Taiwan
Chih-Ming Chen, National Chung Hsing University, Taiwan
Jaeho Lee, Hongik University, South Korea
Zhi-Quan Liu, Shenzhen Institutes of Advanced Technology, CAS, China
Dajian Li, Karlsruhe Institute of Technology, Germany
Yu Zhong, Worcester Polytechnic Institute, USA
Yee-wen Yen, National Taiwan University of Science and Technology, Taiwan
Song-Mao Liang, Clausthal University of Technology, Germany
A S Md Abdul Haseeb, University of Malaya, Malaysia
Ligang Zhang, Central South University, China
Sehoon Yoo, Korea Institute of Industrial Technology, South Korea

SYMPOSIUM SPONSORS
TMS Functional Materials Division
TMS Alloy Phases Committee
