

**SUBMIT AN ABSTRACT BY JULY 1**

**MARCH 14-18, 2021 • ORLANDO WORLD CENTER MARRIOTT  
ORLANDO, FLORIDA, USA  
[www.tms.org/TMS2021](http://www.tms.org/TMS2021) • #TMSAnnualMeeting**

## SUBMIT AN ABSTRACT TO:

### ENERGY & ENVIRONMENT

## ENERGY TECHNOLOGIES AND CO<sub>2</sub> MANAGEMENT

The reliance on fossil fuels for energy is unsustainable and has released an unprecedented amount of carbon dioxide into our atmosphere. The continual research and development effort into clean and sustainable energy technologies and efficient carbon dioxide management are of paramount importance to ensure the responsible progress of human civilisation and innovations. This symposium aims to bring together both academia and industry to jointly address the pressing issues and development of new strategies.

The symposium is open to participants from both industry and academia and will focus on energy efficient technologies including innovative ore beneficiation, smelting technologies, and recycling and waste heat recovery, as well as emerging novel energy technologies. The sessions will also cover various technological aspects of sustainable energy ecosystems, processes that improve energy efficiency, reduce thermal emissions, and reduce carbon dioxide and other greenhouse emissions. Contributions from all areas of non-nuclear and non-traditional energy sources are welcomed.

Topics include, but are not limited to:

- Renewable Energy Resources to Reduce the Consumption of Traditional Fossil Fuels
- Emerging Technologies for Renewable Energy Harvesting, Conversion, and Storage
- New Concepts or Devices for Energy Generation, Conversion, and Distribution
- Waste Heat Recovery and Other Industrial Energy Efficient Technologies
- Energy Education and Energy Regulation
- Scale-up, Stability, and Life-Cycle Analysis of Energy Technologies and Improvement of Existing Energy-Intensive Processes
- Theory and Simulation in Energy Harvesting, Conversion, and Storage
- Design, Operation, and Optimization of Processes for Energy Generation (e.g., Carbon Capture) and Conversion of Energy Carriers
- Energy Efficiency Improvement in Process Engineering (e.g., for biomass conversion and improved combustion) and Electrical Engineering (e.g., for power conversion and developing smart grids)
- Thermo-electric/Electrolysis/Photo-electrolysis/Fundamentals of PV
- Emission Control, CO<sub>2</sub> Capture and Conversion
- Carbon Sequestration Techniques
- CO<sub>2</sub> and Other Greenhouse Gas Reduction Metallurgy in ferrous (iron & steel making and forming), non-ferrous and reactive metals including Critical Rare-earth Metals
- Sustainability and Life Cycle Assessment of Energy Systems
- Thermodynamics and Modelling for Sustainable Metallurgical Processes

### ORGANIZERS

**Yu Lin Zhong**, Griffith University, Australia  
**Xiaobo Chen**, RMIT University, Australia  
**Lei Zhang**, University of Alaska Fairbanks, USA  
**John Howarter**, Purdue University, USA

### SYMPOSIUM SPONSORS

TMS Extraction & Processing Division  
TMS Light Metals Division  
TMS Energy Committee

**Abstract Deadline is July 1, 2020. Submit online at
