## Aluminum Cast Shop Supplier Forum

Launched in 2025, the Aluminum Cast Shop Supplier Forum offers casthouse equipment suppliers a unique platform to present their latest technologies and innovations to the industrial aluminum manufacturing sector. Key topics will include molten aluminum refractories, furnace burner and control technologies, metal treatment and quality measurement, casting/mold technologies, as well as other aspects of casthouse operations that contribute to efficiency and quality improvement.

The forum will be attended by cast shop managers, technical personnel, and industry professionals seeking to stay informed on advancements in casting technologies. While published manuscripts will not be required, presentations will be available to be shared.
