LIGHT METALS

Electrode Technology for Aluminum Production Supplier Forum

The Electrode Technology for Aluminum Production Supplier Forum, launched in 2025, provides a dedicated space for equipment suppliers to showcase their innovations in electrode technology to the aluminum manufacturing community.

Focus areas will include green anode technologies, baking and rodding room equipment, baking furnace refractories, cathode materials and refractories, as well as quality measurement systems, automation, and control technologies relevant to anode and cathode production.

The audience will include carbon and potroom supervisors, managers, and technical staff from across the aluminum industry. While published manuscripts will not be required, presentations will be available to be shared.
